About us

Cryptobanks aims to provide all decentralized finance products in one place. It is a type of all-in-one platform, which offers everything, Like Instant Swap , Farming, Launchpad, Stake And Earn , Dividends.

Ecosystem

1) Swap

Decentralized exchanges take a different approach to buying and selling digital assets: They operate without an intermediary organization for clearing transactions, relying instead on self-executing smart contracts to facilitate trading. In the absence of intermediaries, DEXs take on a non-custodial framework.

2) Farm

Cryptobanks Farming is recognized as an automated market maker (AMM) that allows its users to trade using crypto tokens and hence, provides liquidity. Staking is a process of staking cryptocurrencies that involves buying several tokens of any currency and putting them aside while other transactions are happening.

3) Pools

Pools allow you to provide liquidity by adding your tokens to liquidity pools or "LPs" Token The number of LP tokens you receive represents your portion of the CBC-BNB liquidity pool. You can also redeem your funds at any time by removing your liquidity.

4) Dividends

The Cryptobanks Dapp is a totally decentralized BNB Staking Dapp. Holders of CBC tokens are rewarded in BNB Dividends whenever the tokens are used. This is an eternally sustainable method of earning dividends based on actual usage of the tokens. Cryptobanks dapp will provide dividends for long as the BNB Blockchain exists, That's Contract technologies are made in a way that they can never be shutdown or switched off.

5) NFT Marketplace

CBC NFT market place – The future of trading and collecting

The new trend that has caught the eye of investors is the nonfungible token (NFT) market. NFTs are digital records of proof that represent all types of creations, including popular memes, famous tweets, master recordings, unique artwork, and even GIFs of NBA's greatest buzzer-beaters.

6) Launchpad

Safest launchpad. Multi-chain.

Launching hand-picked high-quality projects on the BSC, Solana, ETH Blockchain.

About Token

1) CryptoBanks Native Token

Cryptobanks also has its own native token, CBC. The token will be used primarily for staking, Farming & For dividends Those who opt to use it for staking will be able to earn a passive income, as they will receive staking rewards for keeping their coins locked up And Also user can Participate In IDO tiers wise.

Roadmap

2021-Q1

Project Origin

Market Trend Research.

2021-Q2

Recruit Developer Management and Marketing Team

2021-Q3

1: Smart Contract Deployment

2: Website Launch

3: Swap, Farming, Pools Launch

2021-Q4

1: Smart Contract Audit

2: Public IDO

3: Partnership

2022- Q1

1: Launchpad Live

2: Dividends Live

3 : Live 2 IDO

4) Start Integrate Cross - chain Launchpad Sach As
Ethereum - Polkadot- Solana- Tron

2022-Q2

1:Cross Chain Launchpad Live

2: BNB - Solana ,BNB - ETH bridge Developement

3: Cex Listing B Catagory

Q3- 2022-Q3
